

Please accept this letter as my highest recommendation of the design-construction firm, Turnkey Engineering Team, Inc. I have had the opportunity to work with Turnkey Engineering Team over the past three years through a variety of new construction and modernization projects, valuing their work over \$1 million. Turnkey's engineering included piping, electrical, mechanical, structural, controls and life safety. Turnkey did all of our design, permitting and construction.

Turnkey Engineering Team has demonstrated a professional and ethical caliber during this time. Schedules have been maintained and all projects have been completed on time and within budget.

Turnkey Engineering Team has worked closely with the City Permit Center to quickly gain permit approval for a series of projects involving toxic gases, along with abatement systems and life safety monitoring systems. Turnkey's knowledge of Codes allows them to offer a variety of options that help us with budget, schedule and quality that other design-build contractors cannot match.
